

# The van that can.

"Finally, a company that realizes large families care about the safety of their children." - *Patricia T, Louisville, KY*

We could have told Patricia that even before her family took ownership of their new SafetyVan. You see, they're the reason we began producing the SafetyVan. Families like theirs deserve to travel in safety and comfort - and only the SafetyVan offers all this at such an extraordinary value.

This isn't your mom's old church van either. The SafetyVan is built on the legendary Chevrolet 3500 Express passenger van - with 155" wheelbase. Add the unique SafetyVan fiberglass reinforced roof and coach-style seating with 3-point restraint system to

a sub-floor strategically secured with 56 bolts and you have the formula for one of the safest and most comfortable high-capacity passenger vans on the market today.

The SafetyVan is easy to own, easy to operate and fits the tight budget of even the largest of families or for that matter, any family with a soccer (or hockey) mom and a team of hard-charging kids, pets and cargo!

The SafetyVan is designed to accommodate up to 14 passengers (including driver.) The most popular **floor plans** are the 10 and 11 passenger versions. You get plenty of seating capacity plus a spacious cargo area behind the rear seats and separated by a luggage barrier for added safety and convenience. The seating is offered in high quality cloth or "soft-as-leather" vinyl fabric. It's hard to imagine a more practical and comfortable ride anywhere. Your family will love it!

**Note:** 17" seats are standard. 20" seats and armrests are available for extra.

**Note:** Other floor plans are available up to 14 passengers - for less storage but more kids and neighbors! Ask for details or visit our web site.
